

WHY WE MUST DO WITHOUT THESE THINGS

Out of our homes and into the battle . . .
a picture story of weapons forged from
everyday peacetime articles now rationed
or discontinued

The steel used in one auto will make a 75 mm. howitzer.

MOTORCARS

NEW TIRES

Seven auto tires use enough rubber for one bomber tire.

Wool in the cuffs of 21 men's suits will make one army uniform.

CUFFS

STOCKINGS

The nylon and silk from 136 pairs of stockings will make one army parachute.

Steel in one washer will make six 3-inch 75 mm. howitzer shells.

WASHING MACHINES

TOYS

A 3½-pound toy locomotive uses enough copper and brass for six .30-caliber bullets.

The shellac in one phonograph record will make a signal flare.

NEW RECORDS

BICYCLES

The steel contained in a junior-size bicycle is enough to make one .30-caliber machine gun.

GOLF CLUBS

The steel used in a set of golf clubs will make 30 hand grenades.

RUGS

An average 9'x12' rug contains jute enough for 32 sandbags and wool for two army uniforms.

DOING WITHOUT

An average wood-burning stove contains enough iron for a 500-pound aerial bomb.

STOVES

Steel in a set of bed springs will make two 4-inch 105 mm. shells.

BEDSPRINGS

A lady's mouton coat will provide the lining for an aviator's jacket.

FURS

Wood in an average desk will make three boxes to hold 3,000 rounds of .50-caliber ammunition.

FURNITURE

An average car consumes gas enough in six months to run a Flying Fortress for one hour.

GASOLINE

A juke box contains plastics for one pursuit plane's cowling.

JUKE BOXES

The aluminum in a coffeepot will make a large incendiary bomb.

ALUMINUM

A radio phonograph contains copper enough for army field radio.

RADIO

200 girdles require the rubber needed for an army gas mask.

GIRDLES

One refrigerator uses steel enough for two 3-inch trench mortars.

REFRIGERATORS

GRAPHS BY PICTOGRAPH
